GRANDS VINS DE BOURGOGNE

ABOUT US

Our work as winemakers involves a great deal of manual labor, especially on our plots where the slope
where the slope makes it impossible to use any mechanical equipment.

Almost all harvesting is done by hand, to take care of the grapes from one end of the process to the other.

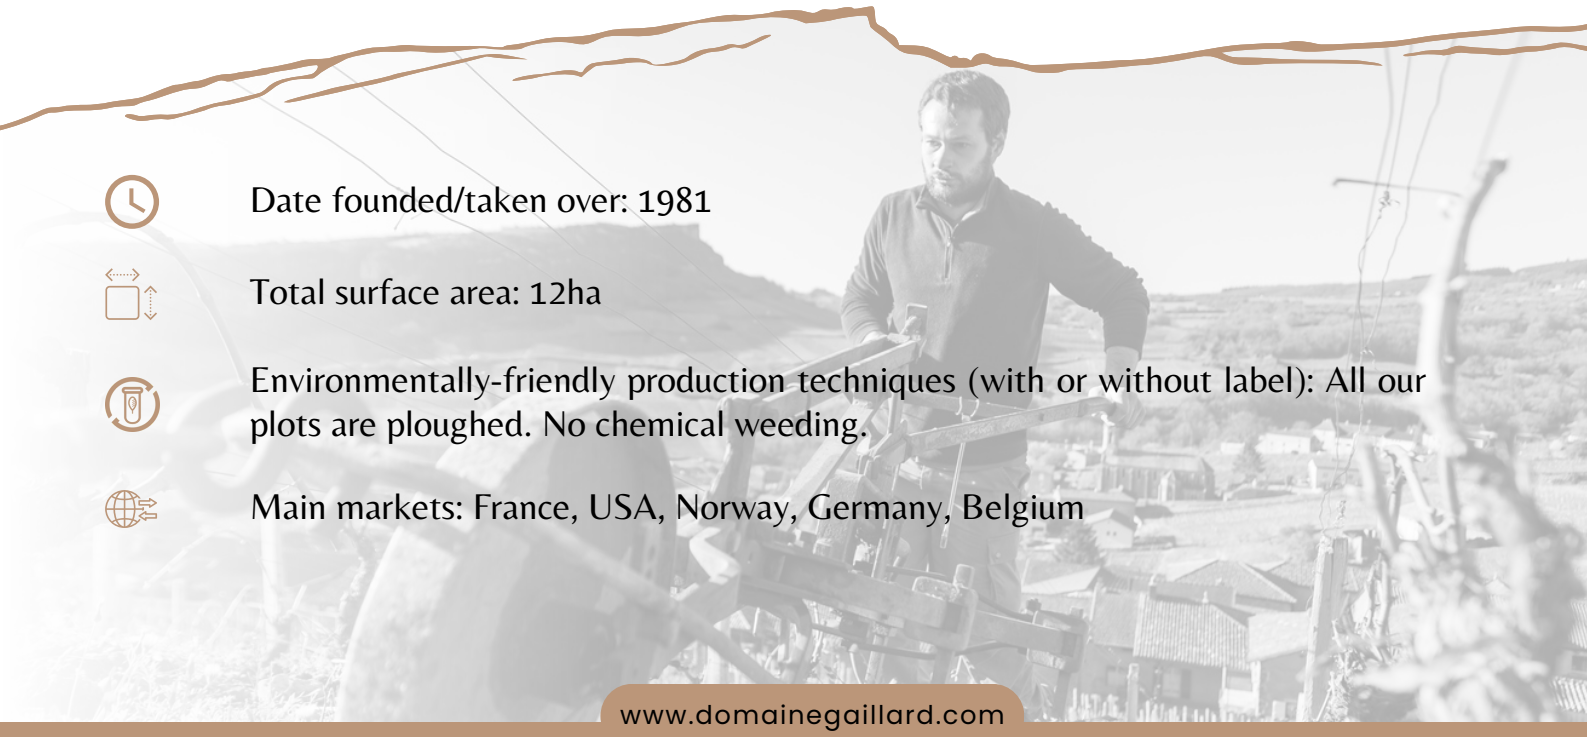
To respect both the environment and the wine, we practice sustainable viticulture.

We maintain grassed plots and are moving towards a moderate use of inputs. Ploughing, digging, harvesting, pruning... we work in our vines every day.

Looking after them remains our essential task.

SPECIFICATIONS

Contains sulfites - Does not contain eggs or egg products - Does not contain milk or milk products



Date founded/taken over: 1981

Total surface area: 12ha

Environmentally-friendly production techniques (with or without label): All our plots are ploughed. No chemical weeding.

Main markets: France, USA, Norway, Germany, Belgium
